WORK EXPERIENCE

BBVA Bank

Buenos Aires, Argentina

Java Developer

Jan 2022 – Present

- Working as a Java back-end developer for the Bank Benefits team.
- Building high-quality micro-services that enable bank users to enjoy the current benefits and discounts.
- Helping companies to set up their own bank promotions into our systems.

Transferz

Amsterdam, Netherlands

Java Developer

Jan 2021 – Jan 2022

- Worked as a back-end developer using Java in the development of an API that allows the reservation of vehicles for transfers between airports for a partner called Servantrip.
- Used GitHub Actions as the continuous integration and continuous delivery platform for automating the build, test, and deployment pipeline.
- Used Datadog for monitoring the output of the requests and determine performance metrics.

BitGo

Palo Alto, California

Java Developer

Jan 2020 – Jan 2021

- Worked integrating some of the highest market capitalization cryptocurrencies (such as AVAX and DOT) to BitGo's platform.
- Building hot, cold and custody wallet solutions to securely integrate digital assets to the customer's portfolio.

Alpha Fintech

Dublin, Ireland

Java Developer

Jan 2017 – Jan 2019

- Worked as a Java back-end developer with Spring Boot Framework creating micro-services and Spring Batch creating batch processing software for an international Fintech company.
- Processed online payments from several payment providers such as American Express, BNZ, Alipay, Payture, RS2, Trustly and many more.
- Created several payment APIs and payment processing Batches from scratch.
- Developed unit tests for every piece of code.
- Worked within an Agile-based framework such as Scrum.
